THE BENEFITS

When you choose PME to maintain your emergency systems and equipment you can rest assured that our service team is led by experienced and trained personnel who are regularly trained in the latest standards and industry practices. We do this via our membership of the Fire Protection Association Australia which enables us to standardise and benchmark our in house and onsite training delivered to our fire technicians to ensure our employees are benefitting from working at PME. PME will simplify and assist your company to meet its compliance requirements for your essential services.

THE COMPANY

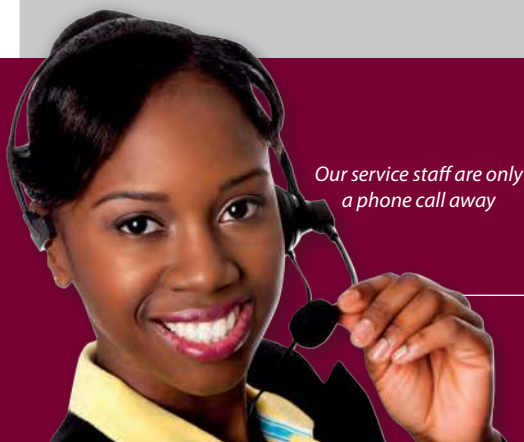

PME has been active in Papua New Guinea since 1968 and has consistently delivered projects using our values and vision to achieve success for our clients. Papua New Guinea is our home and we concentrate our business in country and aim to offer a diverse range of services delivered by experienced personnel who have proven experience and understand the logistical complexities of achieving project success in PNG. Our onsite staff are supported by a resident management team with over 60 years of experience working in and around Papua New Guinea who are available to assist onsite at all times. Our philosophy has always been to train the next generation of industry leaders, we achieve this result by following a training plan that allows domestic workers access to their foreign counterparts allowing knowledge and experience transition. In doing this we believe we are a socially responsible company committed to helping Papua New Guineans achieve their aims and goals.

THE PEOPLE

Our staff play a vital role in ensuring the success of our business. We have an environment based on teamwork. The occupational health and safety of all persons employed within the organization and the worksites we service are considered to be of the utmost importance.

“Proper installation and servicing of your fire protection equipment is an investment in the safety and well being of the people, property and business in your care.”

- Fire Equipment Sales
- Fire Sprinkler Installation
- Fire Equipment Service
- Professional Fire Safety Advice

Our service staff are only a phone call away

From small to large installations, our service technicians will assist you in complying with your service requirements

SERVICING

Our team of professionals service all types of fire fighting equipment. They ensure that our customers have peace of mind, safe in the knowledge that their staff and premises have adequate equipment. There is now a distinct clear advantage for adopting one single contract such as total visibility of your fire safety strategy; asset registers of all your fire safety equipment; You can rest assured that there will be no gaps in your level of fire protection, that will commonly occur if you have several fire providers.

REPAIRS AND INSTALLATIONS

We offer 24hr service to all our clients 7 days a week. Minor repairs right through to brand new installations and building alterations to meet client requirements. All works are always completed by licensed trades people and trained technicians.

FIRE PROTECTION SERVICES

We supply, install and maintain complete systems. These include Smoke Detectors, Fire Alarm Panels, Exit and Emergency Lighting, Fire Sprinkler Systems and Fire Hydrant System Pumps. All servicing and installations are always carried out in full compliance with current Australian Standards.

Automatically scheduled maintenance visits – PME uses its computer database management system to schedule your sites individual requirements. Our program insures your routine testing and servicing is completed on time every time.

- Quotations are generated as a result of faults identified through routine testing and maintenance
- Full asset tracking

ENVIRONMENT

PME is committed to the environment and strives to continually improve all our operations. We strive to protect the environment by minimizing waste within our control and following best management practices and procedures and are constantly being reviewed.

The weekly, quarterly and annual flow testing of fire sprinkler systems is one of the many areas we can assist you
