THE BENEFITS

When you choose PME you can rest assured that our team is led by experienced and trained personnel who are regularly trained in the latest standards and industry practices. We do this via our membership of associations in Australia which enables us to standardise and benchmark our in house and onsite training delivered to technicians to ensure our employees are benefitting from working at PME. PME will simplify and assist your company to meet its compliance requirements for your services.

“Proper installation and servicing of your equipment is an investment in the safety and well being of the people, property and business in your care.”

THE COMPANY

PME has been active in Papua New Guinea since 1968 and has consistently delivered projects using our values and vision to achieve success for our clients. Papua New Guinea is our home and we concentrate our business in country and aim to offer a diverse range of services delivered by experienced personnel who have proven experience and understand the logistical complexities of achieving project success in PNG. Our onsite staff are supported by a resident management team with over 60 years of experience working in and around Papua New Guinea who are available to assist onsite at all times. Our philosophy has always been to train the next generation of industry leaders, we achieve this result by following a training plan that allows domestic workers access to their foreign counterparts allowing knowledge and experience transition. In doing this we believe we are a socially responsible company committed to helping Papua New Guineans achieve their aims and goals.

THE PEOPLE

Our staff play a vital role in ensuring the success of our business. We have an environment based on teamwork. The occupational health and safety of all persons employed within the organization and the worksites we service are considered to be of the utmost importance.

ENVIRONMENT

PME is committed to the environment and strives to continually improve all our operations. We strive to protect the environment by minimizing waste within our control and following best management practices and procedures which are constantly being reviewed.
