Automatic Voltage Conditioners (AVCs)

Protecting equipment from power fluctuations across Papua New Guinea since 1968

Inconsistent power supply is a common issue in many parts of Papua New Guinea and can cause serious damage to sensitive equipment. Port Moresby Electrical offers reliable Automatic Voltage Conditioners (AVCs) designed to regulate and stabilise voltage, ensuring your systems are protected from voltage surges, sags and imbalances.

Nationwide supply and servicing of Automatic Voltage Conditioners backed by expert support

PME distributes AVC solutions across Papua New Guinea, ensuring businesses in both urban and remote areas have access to stable, regulated power. Our established logistics network and in-country technical expertise mean your systems are supported from installation through to long-term servicing.

At PME you can be assured there are no gimmicks! We offer reliable service, quality products and knowledgeable, well trained staff, to help you take the guess work out of choosing the right solution for you. So call us today and get the best service and price in Port Moresby.

Automatic Voltage Conditioners (AVCs)

Protecting systems with ongoing monitoring and instant adjustments

Automatic Voltage Conditioners (AVCs) are designed to stabilise the electrical supply by correcting fluctuations in incoming voltage. They constantly monitor the power supply and adjust it within milliseconds to maintain a steady output.

Voltage regulation

When voltage levels drop (sags) or rise (surges), the AVC automatically increases or reduces them to a safe range.

Protection

This prevents equipment damage, downtime, and data loss caused by unstable power.

Efficiency

AVCs improve the lifespan and performance of sensitive electrical systems by keeping voltage consistent without manual intervention.

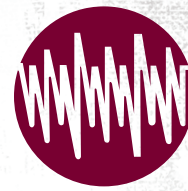

At PME you can be assured there are no gimmicks! We offer reliable service, quality products and knowledgeable, well trained staff, to help you take the guess work out of choosing the right solution for you. So call us today and get the best service and price in Port Moresby.

Automatic Voltage Conditioners (AVCs)

Supporting various industries with consistent power supply

Automatic Voltage Conditioners aren't tied to one industry; they can be used to monitor, protect and regulate a wide range of sensitive equipment across various sectors.

ICT & communications

Stable power keeps servers, data centres, and communication networks online, avoiding costly interruptions and data corruption.

Government & public sector

Critical infrastructure and services such as emergency response centres and public administration systems remain operational and secure under stable power conditions.

Manufacturing & industrial plants

Machinery, robotics, and automated production lines need consistent voltage to maintain safety, efficiency, and product quality. AVCs reduce costly downtime and equipment wear.

Medical facilities & laboratories

Life-support machines, imaging equipment, and laboratory devices require precise, uninterrupted voltage. AVCs help protect patients and ensure reliable test results.

Banking & finance

ATMs, online transaction systems, and trading platforms rely on uninterrupted power. AVCs safeguard these from voltage issues that could cause outages or security risks.

Education & commercial offices

Computers, AV systems, and online learning platforms benefit from stable voltage, minimising disruptions to teaching, learning, and day-to-day operations.

Committed to safety and sustainability

At PME, protecting people and the environment is what drives our work every day. We help clients conserve energy, support communities, and build stronger economies across Papua New Guinea. For us, sustainability is not just a responsibility; it's a privilege.

Just like sustainability, safety is at the core of everything we do. With a clear Safety Management Plan in place, we make sure every project is carried out the safest way possible. Our team is trained to identify risks early, put safe practices into action, and keep every site a safe place to work.

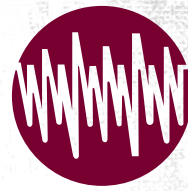

At PME you can be assured there are no gimmicks! We offer reliable service, quality products and knowledgeable, well trained staff, to help you take the guess work out of choosing the right solution for you. So call us today and get the best service and price in Port Moresby.

Why choose PME for UPS sales & service?

Tailored solutions

We offer UPS systems that are custom-selected to meet your business's power requirements, from small office setups to large-scale commercial and industrial facilities.

Expert installation

Our qualified team handles everything from sizing and supply to professional installation, ensuring that your system integrates seamlessly with your existing electrical infrastructure.

Certified technicians

Our technicians are trained and certified by leading OEMs in the UPS industry. This ensures that every installation, service, and repair is carried out to the highest standard—backed by technical expertise and manufacturer-specific best practices.

Preventative maintenance & servicing

Regular servicing is key to extending the life of your UPS and avoiding unexpected failures. PME provides scheduled maintenance programs as well as emergency repair services.

Load resting & battery replacement

We conduct onsite load testing and battery assessments to ensure your system is performing at optimal capacity. When it's time to replace batteries, we'll provide fast and reliable service with minimal disruption to your operations.

24/7 support

Power outages can happen at any time. Our technicians are available around the clock to respond to breakdowns and ensure your critical systems remain protected.

At PME you can be assured there are no gimmicks! We offer reliable service, quality products and knowledgeable, well trained staff, to help you take the guess work out of choosing the right solution for you. So call us today and get the best service and price in Port Moresby.
