

Drain Cleaning Service

PME offer an unbeatable drain cleaning service, using state of the art high pressure water jetting equipment.

This machine uses high pressure water to cut through just about any blockage or just remove of build up within the pipe work, before it becomes a problem. Drain cleaning jettors are capable of unblocking long runs of pipe work as small as 40mm, up to 225mm and are easy, efficient and cost effective.

TYPICAL BLOCKAGE

UNBLOCKED WITH A CABLE

UNBLOCKED WITH HIGH PRESSURE JETTER

HIGH PRESSURE WATER JETS

Why use High Pressure Jetting?

- Uses high pressure jets of water (4300 PSI) to remove build-up and debris in water lines, sewer lines, storm water line, conduits and much much more.
- Spinning streams of water blast the build-up at many different angles, breaking up the debris, washing it all away and leaving the inside surface of your pipes clean!
- Penetrates built-up grease, soap scum, mineral, sand, sediment, scale, leafs, hair, & even roots!
- Designed for safe use on all type of drains, conduits and water lines, yet so powerful it will cut through a 2x4 piece of timber in about 30 seconds!
- Drain cleaning jettors can unblock drains anywhere up to 60m away from the machine.

PME provide a full range of Plumbing, Drainage and Wet Fire services to all types of domestic, commercial, industrial and Government customers across Papua New Guinea. This covers new installations, Repairs and Programmed Maintenance Services
